

Palliative Care in Aged Care

Step 1 Getting the basics in place

- The fundamentals from PalliAged, PCC4U, PEPA and ELDAC
- Ongoing education and training
- Competency in the clinical assessment of the deteriorating and terminal phase
- Advance Care planning / Goals of Care
- Systems to report deterioration early e.g 'stop and watch', 'report and respond'

Step 2 Building knowledge and capacity

- Use ELDAC facilitated program to build your capacity
- Policy and procedures
- Advance Care Planning Champions
- Continued formal professional development
- Palliative Care needs round in RACF

Step 3 Measuring your outcomes and benchmark against your peers

- Sustain continuous improvement
- Implement Palliative Care outcomes
- Collaboration
